

Frogs, Toads and Salamanders

Registration Period: **March 26 to April 3, 2018**

The registration form for this project can be found on the **TRAINING** and **WORKSHOPS** page of our Web site

Project Description

In this cultural mediation project, students will discover the transformative world of the pond during the spring. The students will have an unforgettable experience of sampling life in a beautiful natural pond at the Morgan Arboretum in the month of May, accompanied by a seasoned naturalist and guide. As the children dip their nets, many discoveries will be made about the creatures who start their lives in the water of the pond but who will then leave the pond for the forest or the field. These true **transformers** will awaken in your students a sense of wonderment and connection about the natural world and will offer you a myriad of learning possibilities.

Project sequence: **May 2 to June 1st, 2018**

1. On May 2nd, teachers will meet at the Morgan Arboretum (Sainte-Anne-de-Bellevue) for a day of preparation with the naturalist. **The workshop is compulsory for the participating teachers.**
2. Between May 28th and June 1st, classes will spend the day at the Morgan Arboretum.
(Each class will attend one full day)
3. In class, students will create a collaborative tool to explain their learning to peers and parents.

Target audience: 10 Elementary classes in **cycle 1**

Organization responsible for the project: *A Montreal School for All (AMSFA)*

Professional Resource: Nancy Saltarelli - nancy.saltarelli@re-mtl.qc.ca

Partner Organization: Earthvalues Institute and Morgan Arboretum

**A Montreal School for All will cover all costs for this project, including bussing.*

Participants are selected according to English school boards proportional distribution.
